SUMMARY	Magna Cum Laude Computer Science graduate with hands-on experience in full-stack development, enterprise internal systems, AI-powered automation workflows, APIs, databases, dashboards, and deployments. Skilled in React, Next.js, TypeScript, Supabase, PostgreSQL, Vercel, REST APIs, PHP, SQL Server, and AI-powered application development.	
TECHNICAL SKILLS	Languages: TypeScript, JavaScript, Python, PHP, SQL, Java Backend & Database: Node.js, PHP, SQL Server, PostgreSQL, Supabase, Firebase, REST APIs AI & Automation: Prompt Engineering, OpenAI API, Gemini API, AI Workflow Automation, Web3 Monitoring, Autoencoders, Graph Convolutional Networks	Frontend: React, Next.js, Tailwind CSS, HTML/CSS, Three.js, GSAP Cloud & Tools: Vercel, AWS, Docker, Git, GitHub, XAMPP, Codex, Claude Code
EXPERIENCE	Full-Stack Developer Intern Dec 2025 - Mar 2026 La Rose Noire Philippines, Inc. - Built enterprise internal systems and role-based portals using PHP, SQL Server, Tailwind CSS, and JavaScript. - Implemented workflow automation, approval flows, backend logic, and secure data handling for internal operations. - Designed dashboards and administrative interfaces for tracking operational activity and managing internal tools. - Developed real-time and cross-device operational features, including system interactions for production environments. - Supported troubleshooting, technical updates, infrastructure tasks, networking, servers, and device deployment where needed.	
FEATURED PROJECTS	AI-Powered Web3 Automation Platform Next.js, TypeScript, Supabase, Gemini API, Vercel, REST APIs, Alchemy Built a full-stack AI/Web3 automation platform using Next.js, TypeScript, Supabase, Gemini API, Vercel, REST APIs, and Alchemy. Implemented blockchain wallet monitoring, transaction ingestion, AI-powered rule parsing, scheduled backend checks, and in-app/Telegram alert delivery. Designed Supabase-backed workflows for blockchain data enrichment, wallet activity summaries, and backend automation using modern TypeScript architecture. AI-Based Facebook Phishing Detection System Python, JavaScript, Firebase, Autoencoders, Graph Convolutional Networks Developed a browser extension and capstone research system for phishing link detection using URL feature extraction, anomaly detection, Autoencoders, Graph Convolutional Networks, dataset evaluation, and user reporting workflows. CentralPoint / CentralPoint Core PHP, SQL Server, Tailwind CSS, JavaScript Built an enterprise internal portal and administrative control center with modular permissions, role-based access control, internal application management, and dynamic operational dashboards for organizational workflows. Distributed Audio Broadcasting System PHP, SQL Server, HTML5 Audio API Implemented synchronized multi-device audio broadcasting with server-authoritative timing, latency correction, dynamic playback control, and centralized operational management for production room environments.	
EDUCATION	Holy Angel University 2022 - 2026 Bachelor of Science in Computer Science Magna Cum Laude AWS Cloud Foundations Cisco Cybersecurity Essentials Cisco Cyber Threat Management CCNA: Introduction to Networks
