SUMMARY

Computer Science graduate and Magna Cum Laude with hands-on experience building full-stack apps, AI-powered automation workflows, internal systems, and operational dashboards, with additional Web3 exposure. Skilled in React, Next.js, TypeScript, Node.js, Supabase, Vercel, PHP, and SQL Server, with experience supporting deployments, APIs, integrations, troubleshooting, and startup-style technical operations.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, PHP, SQL, Java

Backend, Cloud & Database: Node.js, Supabase, Firebase, SQL Server, REST APIs, Vercel, AWS

Tools & Integrations: GitHub, Docker, XAMPP, Antigravity, Codex

Frontend: React, Next.js, Tailwind CSS, HTML/CSS, Three.js, GSAP

AI / Automation: Gemini API, AI-assisted workflows, Web3 monitoring, Autoencoders, Graph Convolutional Networks

EXPERIENCE

Full-Stack Developer Intern Dec 2025 - Mar 2026
La Rose Noire Philippines, Inc.

- Engineered enterprise internal systems and role-based operational platforms using PHP, SQL Server, Tailwind CSS, and JavaScript.
- Built workflow automation pipelines, approval systems, and secure backend architectures for internal business operations.
- Implemented real-time synchronization workflows and cross-device operational tooling for production environments.
- Designed responsive dashboards and administrative interfaces that streamlined manual workflows for cross-functional teams.
- Supported software engineering and infrastructure operations, including technical updates, networking, servers, device deployment, and production troubleshooting.

FEATURED PROJECTS

AI Web3 Automation Assistant
Next.js, TypeScript, Supabase, Gemini API, Vercel, REST APIs, Alchemy
Built a full-stack AI/Web3 automation platform for blockchain wallet monitoring, transaction ingestion, AI-powered rule parsing, scheduled checks, and in-app/Telegram alert delivery. Designed Supabase-backed workflows for Alchemy API enrichment, wallet activity summaries, and backend automation using modern TypeScript architecture.

Facebook Phishing Detector
Python, JavaScript, Firebase, Autoencoders, Graph Convolutional Networks
Developed a browser extension for real-time Facebook phishing link detection using hybrid anomaly detection and graph-based machine learning techniques. Implemented URL feature extraction, phishing classification workflows, dataset evaluation pipelines, and user reporting systems.

CentralPoint / CentralPoint Core
PHP, MSSQL, Tailwind CSS, JavaScript
Built an enterprise internal portal and administrative control center with modular permissions, role-based access control, internal application management, and dynamic operational dashboards for organizational workflows.

Distributed Audio Broadcasting System
PHP, SQL Server, HTML5 Audio API
Implemented synchronized multi-device audio broadcasting with server-authoritative timing, latency correction, dynamic playback control, and centralized operational management for production room environments.

EDUCATION

Holy Angel University 2022 - 2026
Bachelor of Science in Computer Science | Magna Cum Laude
AWS Cloud Foundations | Cisco Cybersecurity Essentials | Cisco Cyber Threat Management | CCNA: Introduction to Networks
