

JONAS ELCID N. DAVID

Full-Stack Developer / AI Developer / Automation Engineer

Philippines | 0908-678-2848 | jonaselcid30@gmail.com | linkedin.com/in/jonas-david-487722352 | github.com/Elciid | portfolio-application-swart.vercel.app

SUMMARY

AI Software Engineer and Full Stack Engineer building SaaS applications, RAG systems, and enterprise internal tools. Recent Magna Cum Laude Computer Science graduate with hands-on experience across Next.js, React, TypeScript, FastAPI, Python, Supabase, PostgreSQL, pgvector, REST APIs, and Gemini-backed AI features. Focused on secure multi-tenant architecture, authentication, document intelligence, workflow automation, and product-oriented engineering.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, PHP, SQL, Java

Frontend: Next.js, React, Tailwind CSS, HTML/CSS, Three.js, GSAP

Backend: FastAPI, REST APIs, Node.js, PHP, Supabase Authentication, backend authorization

Databases: PostgreSQL, Supabase Postgres, pgvector, SQL Server, Firebase

AI Engineering: RAG, Embeddings, Semantic Search, Vector Databases, Prompt Engineering, Gemini API, LLM Integration, AI Automation

Cloud & Dev Tools: Git, GitHub, Docker, AWS, Vercel, Codex, Claude Code, XAMPP

EXPERIENCE

Full-Stack Developer Intern, La Rose Noire Philippines, Inc.

Dec 2025 - Mar 2026

- Built internal tools, role-based portals, and operational dashboards with PHP, SQL Server, JavaScript, and Tailwind CSS for enterprise workflows.
- Implemented backend logic, SQL-driven data flows, approval/workflow automation, and secure data handling for internal systems.
- Developed admin interfaces for tracking operational activity, managing internal applications, and supporting production-floor workflows.
- Supported troubleshooting, technical updates, infrastructure tasks, networking, servers, and device deployment as needed.

PROJECTS

Jarvis - Multi-Tenant AI SaaS / Company Knowledge Platform

Next.js, React, TypeScript, FastAPI, Python, Supabase, PostgreSQL, pgvector, Gemini API, REST APIs

- Built a full-stack RAG platform for company-scoped knowledge with Supabase Authentication, workspace creation, active memberships, protected app routes, and FastAPI bearer-token validation.
- Implemented document ingestion for PDF/DOCX/TXT with private Supabase storage, status lifecycle, backend extraction, text normalization, recursive chunking, and safe processing errors.
- Developed embedding and retrieval pipeline using Gemini embeddings, pgvector storage, backend-only semantic search RPC, company-scoped RLS, and REST endpoints for search, context, and assistant flows.
- Shipped Context Builder and grounded Knowledge Assistant that retrieve authorized source chunks, construct bounded prompt context, return source documents/chunk previews, and answer only from available company information.

AI Web3 Automation Platform

Next.js, TypeScript, Supabase, Gemini API, Alchemy, Telegram, Vercel

- Built an event-driven automation workspace for wallet monitoring, blockchain activity ingestion, AI rule parsing, transaction summaries, and in-app/Telegram alerts.
- Designed Supabase Auth, Postgres, and RLS workflows with server-side integrations that keep Alchemy, Gemini, Telegram, and service-role secrets off the client.

CentralPoint

PHP, SQL Server, Tailwind CSS, JavaScript

- Built enterprise intranet portal and admin layer for internal app access, live feeds, messaging, meeting scheduling, venue conflict checks, notifications, and modular permissions.
- Designed role-aware dashboards and backend SQL Server integrations for managing operational workflows in a secure internal environment.

Facebook Phishing Detection

Python, JavaScript, Firebase, Docker, Autoencoders, Graph Convolutional Networks

- Developed browser extension and HTTPS REST backend that extract Facebook post URLs, analyze phishing risk, blur suspicious posts, and provide user controls for inspection/reporting.
- Built hybrid detection pipeline using URL lexical features, Autoencoder anomaly detection, and GCN domain relationship signals, with dataset evaluation reported in the case study.

EDUCATION

Holy Angel University - Bachelor of Science in Computer Science, Magna Cum Laude

2022 - 2026

Certifications: AWS Cloud Foundations; Cisco Cybersecurity Essentials; Cisco Cyber Threat Management; CCNA: Introduction to Networks
