SUMMARY	Computer Science graduate and Magna Cum Laude with hands-on experience building full-stack enterprise systems, AI-powered automation workflows, and Web3 monitoring platforms. Skilled in React, Next.js, TypeScript, Supabase, PHP, and SQL Server, with experience designing scalable dashboards, backend architectures, intelligent automation pipelines, and operational tooling.	
TECHNICAL SKILLS	Languages: TypeScript, JavaScript, Python, PHP, SQL, Java Backend & Database: Node.js, Supabase, Firebase, SQL Server, REST APIs Tools: Git, Docker, XAMPP, Antigravity, Codex	Frontend: React, Next.js, Tailwind CSS, HTML/CSS, Three.js, GSAP AI / ML / Web3: Gemini API, Alchemy, Autoencoders, Graph Convolutional Networks
EXPERIENCE	Full-Stack Developer Intern La Rose Noire Philippines, Inc. - Engineered enterprise internal systems and role-based operational platforms using PHP, SQL Server, Tailwind CSS, and JavaScript. - Built workflow automation pipelines, approval systems, and secure backend architectures for internal business operations. - Implemented real-time synchronization workflows and cross-device operational tooling for production environments. - Designed responsive dashboards and administrative interfaces that streamlined manual workflows for cross-functional teams. - Contributed to both software engineering and infrastructure operations, including networking, servers, and device deployment.	Dec 2025 - Mar 2026
FEATURED PROJECTS	AI Web3 Automation Assistant Next.js, TypeScript, Supabase, Gemini API, Alchemy Built a full-stack AI/Web3 automation platform for blockchain wallet monitoring, transaction ingestion, AI-powered rule parsing, scheduled monitoring, and in-app/Telegram alert delivery. Integrated blockchain enrichment pipelines, intelligent transaction summaries, and backend automation workflows using Supabase and modern TypeScript architecture. Facebook Phishing Detector Python, JavaScript, Firebase, Autoencoders, Graph Convolutional Networks Developed a browser extension for real-time Facebook phishing link detection using hybrid anomaly detection and graph-based machine learning techniques. Implemented URL feature extraction, phishing classification workflows, dataset evaluation pipelines, and user reporting systems. CentralPoint / CentralPoint Core PHP, MSSQL, Tailwind CSS, JavaScript Built an enterprise internal portal and administrative control center with modular permissions, role-based access control, internal application management, and dynamic operational dashboards for organizational workflows. Distributed Audio Broadcasting System PHP, SQL Server, HTML5 Audio API Implemented synchronized multi-device audio broadcasting with server-authoritative timing, latency correction, dynamic playback control, and centralized operational management for production room environments.	
EDUCATION	Holy Angel University Bachelor of Science in Computer Science Magna Cum Laude AWS Cloud Foundations Cisco Cybersecurity Essentials Cisco Cyber Threat Management CCNA: Introduction to Networks	2022 - 2026
